

Patient Introduction to Care Conference (script)

I would like to organize a meeting with you, your caregivers and your Care Team to ensure that everyone involved in your care is aware of what is most important to you right now. Together, we will further develop your Coordinated Care Plan (CCP) and establish our actions to support you in achieving your goals.

The Coordinated Care Conference will also help all of your care providers develop a plan to continue to communicate with each other so we can offer you coordinated care.

Discussion points:

- Which Care Team members should be invited to this meeting?
- Are there others not yet on the Care Team that should be invited?
- Do you (the patient) feel comfortable attending this meeting, or would you like your caregiver to attend?
- Suggested date, time and location of the meeting.
